BATTERIES EVENT 2026

FRANCE

NOV. 16 > 18 | LYON

About the event

For 28 years, a leading international reference event for the battery industry.

Batteries Event combines experience, credibility, and continuous innovation to serve a fast-evolving global market.

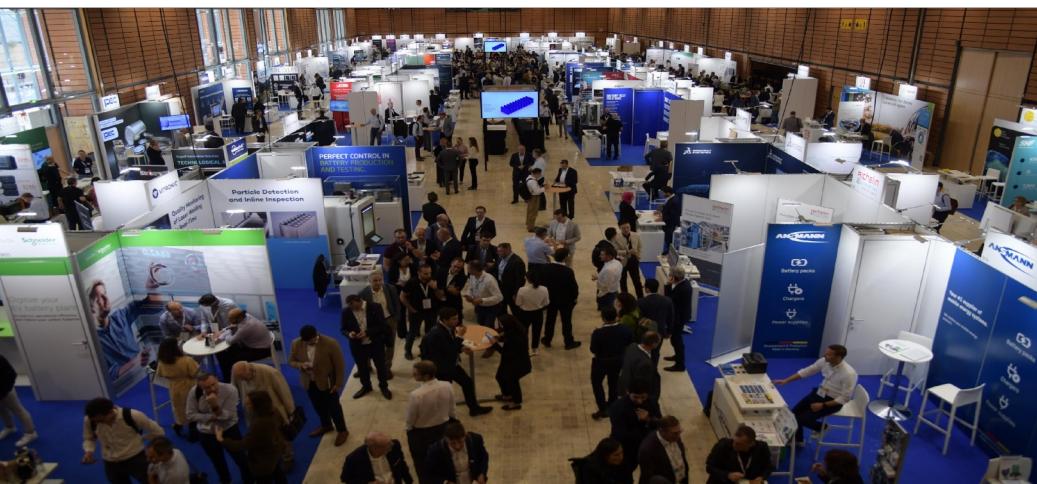

Building on Our Legacy & Shaping New Experiences

For 28 years, a leading international reference event for the battery industry.

Batteries Event combines experience, credibility, and continuous innovation to serve a fast-evolving global market.

Connecting the Industry & Advancing the Value Chain

“ We are delighted to welcome you to the 2026 edition of Batteries Event, which will take place from Monday, November 16 to Wednesday, November 18, 2026, at the Cité Internationale Congress Center in Lyon, France.

For nearly three decades, our ambition has remained the same: to provide a high-level forum where key stakeholders from across the battery industry come together to share insights, exchange best practices, and discuss major trends - from production to recycling and second life.

Each year, Batteries Event brings together international leaders, experts, and decision-makers committed to shaping the future of the battery value chain through innovation, collaboration, and sustainable growth.

We look forward to welcoming you in Lyon. ”

Christophe PIILLOT
Avicenne Energy Director

THE BENCHMARK EVENT IN THE BATTERY MARKET

All the technologies - All the applications - All the aspects of the value chain

Empowering the Global Battery Ecosystem for 28 Years

Since 1999, Batteries Event has served as a strategic platform for innovation, business development, and long-term partnerships.

Through high-level conferences, exhibitions, and networking opportunities, the event promotes industrial performance, technological progress, and sustainable growth.

Today, Batteries Event is recognized as a key meeting point for shaping the future of the battery value chain.

The event will address specific issues relating to batteries:

- Battery research and development: Li-ion batteries but also NiMH, lead acid, Ultra capacitors, Flow battery, fuel cells
- Batteries for EV, HEV, PHEV
- New products and new developments
- Micro batteries, thin film batteries, and applications
- Industrial and consumer applications
- Energy Storage Batteries (Solar, Wind, Smart Grid)
- Marketing and business issues
- Raw materials: anode, cathode, separators, electrolyte, binders...
- Safety and security issues
- 2nd Life battery market
- Recycling
- Industrial Process
- Thermal management systems
- Pack integration
- Battery Management systems
- Battery testing, battery controls
- ...

3 Days Designed for Insight, Connection, and Impact

From high-level perspectives to in-depth discussions, the NEW 2026 program has been carefully designed to deliver a balanced and high-quality experience for all industry stakeholders.

- **Day 1** begins with high-level tutorials, thematic symposiums, and deep-dive sessions. The exhibition opens at 2:30 PM and is officially launched with an opening evening at the heart of the exhibition, before continuing over the following two full days.
- **Day 2** begins with a plenary session, setting the tone for the day, followed by parallel sessions in which leading experts explore all major themes.
- The day concludes with the Gala Dinner, a key networking event.
- **Day 3** features further parallel sessions and high-level plenaries focused on battery production in Europe, gigafactories, value chain challenges, and future perspectives.

Batteries Event offers a premium space where global leaders connect, exchange, and shape the future of the industry.
